HYGIENE CONCEPT

OUR GUIDELINES FOR EXHIBITORS

AS OF: NOVEMBER 3, 2020

YOUR SAFETY

IS OUR MAIN PRIORITY

We are pleased that by implementing a few simple measures we are able to again organise E-world together with you. To this end, we have developed a hygiene and protection concept aligned with the current Coronavirus Protection Ordinance of the State of North Rhine-Westphalia so our trade fair can take place safely.

This brochure provides an overview of our hygiene concept so you can see at a glance what measures must be implemented before and during your trade fair participation and how you can ensure maximum safety at your stand.

You will see that effective infection protection can be easily integrated into your trade fair activities.

We appreciate your collaboration to ensure a safe and successful event for all exhibitors, visitors as well as yourself and your employees.

WE ARE HERE TO HELP YOU STAY IN TOUCH – NOW AND IN THE FUTURE.

HYGIENE CONCEPT

STAND CONSTRUCTION AND DISMANTLING

Your employees and service partners are issued with personalised tickets for the construction and dismantling phases. These are scanned at the entrances to the trade fair site. You can book your tickets online via the dedicated exhibitors' area. To do so, we will provide you with personal login data.

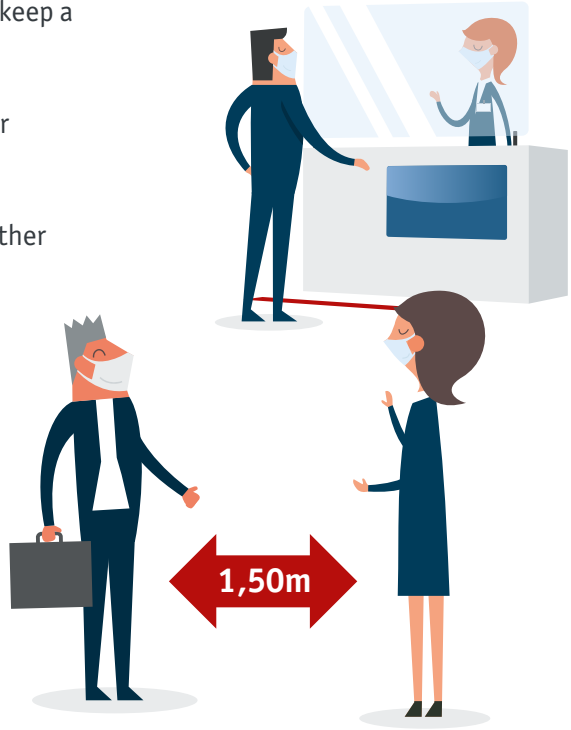
A face mask must be worn during construction and dismantling if it is not possible to keep a distance of 1.5 metres from other people.

STAND DESIGN

Please design your stand in such a way that it is possible to keep a distance of at least 1.5 metres between two persons.

Please take suitable precautions to prevent droplet or smear infection. These include:

- Installing transparent screens at reception desks and other interaction points
- Applying floor markings to guide visitors and ensure they keep their distance
- Providing hand sanitiser
- Installing generously sized meeting rooms and hospitality areas



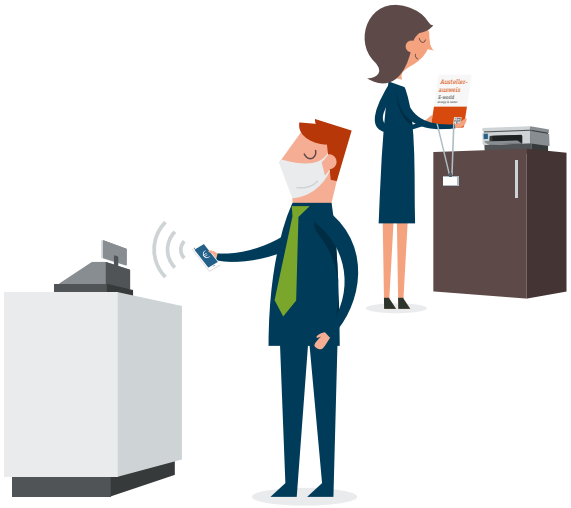
HYGIENE CONCEPT

REGISTRATION, ACCESS AND ADMISSION

Your team and service staff must each pre-register online. This will enable authorities to trace their contacts if necessary. It also serves to accurately record attendance figures.

Exhibitor passes and service staff passes will be scanned contact-free when entering the fair. A badge will be printed on site which you should keep with you in a clearly visible place for the entire duration of the fair.

Cashless and contact-free payment (e.g. of parking tickets or in restaurants) is possible.



DURING THE EVENT

If it is possible to maintain a minimum distance of 1.5 metres between two persons, there is no limit on the number of visitors to a stand. For the same reason, there is no need to register your stand's visitors.

Face masks must be worn in the exhibition halls.

Face masks are not required in the following areas:

- Seating at a stand
- Outdoor spaces
- Seating in catering facilities such as restaurants or Coffee Points

Exhibitors are responsible for ensuring compliance with distance and hygiene regulations at their own stands. Stand parties, receptions or similar must be approved separately by the event organiser.

We recommend using the German federal government's "Corona-Warn-App". It is available as a free download in the App Store and from Google Play.

HYGIENE CONCEPT

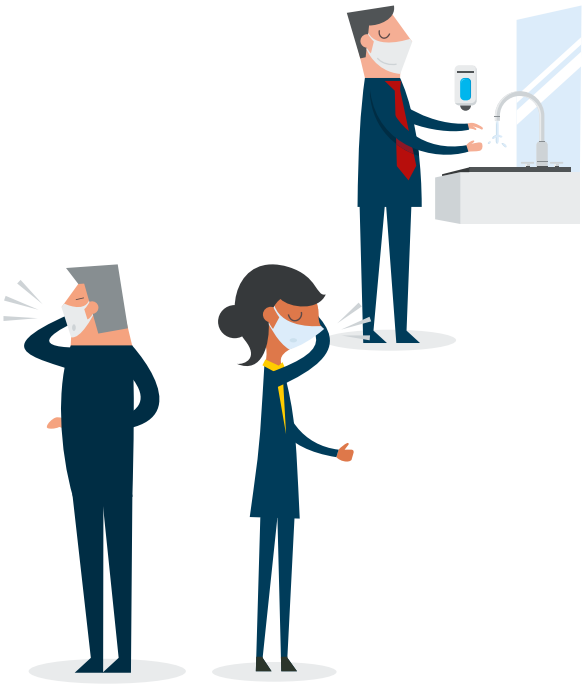
HYGIENE AND PROTECTION MEASURES

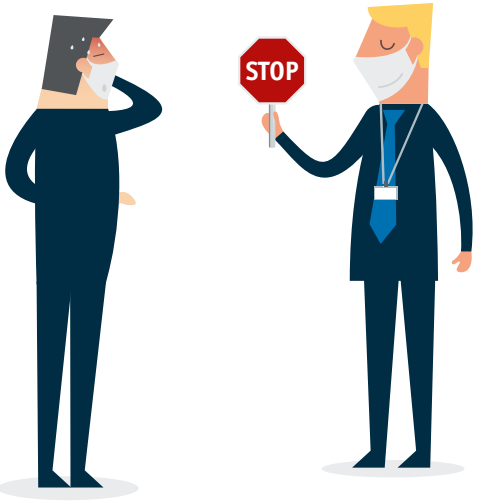
Please provide hand sanitiser at your stand and also regularly disinfect your own hands. In addition, we have installed a large number of hand sanitiser dispensers and hand-washing facilities throughout the site.

Please ensure that contact surfaces such as counters, tables and door handles are cleaned regularly.

Please respect the coughing and sneezing etiquette and keep your distance from other people.

Greet visitors to your stand with a smile instead of a hand shake.





You may not participate in the event if any of the following apply:

- You have had contact with a Covid-19 patient in the last 14 days.
- You are suffering from acute and non-specific general symptoms, cold symptoms or respiratory symptoms.
- You have visited a coronavirus risk area as designated by the Robert Koch Institut (RKI) and cannot provide evidence of a negative coronavirus test (performed within 48 hours before arrival in Germany or after arrival in Germany).

HYGIENE CONCEPT

CATERING & RESTAURANTS

All our restaurants apply the general rules for the catering sector. These include removing your face mask once you are seated and registering your contact details. The rules to keeping your distance to other persons also apply at our Snack Points.

Catering staff at your stand must always wear a face mask and disposable gloves.

Please be sure to avoid open food and drink offerings such as buffets or open trays when using catering at your stand. It is possible to serve food in individual, covered containers and beverages in separate bottles.

Our catering partners will be happy to design an individual catering concept to meet your needs. If you choose not to work with one of the Messe Essen catering partners, your service provider must prove compliance with the Coronavirus Protection Ordinance of the State of North Rhine-Westphalia.
