"Solutions for a Sustainable Future" – this is the motto under which the decision-makers of the energy industry will once again come together at E-world energy & water from June 21 to 23, 2022. International exhibitors will present sustainable technologies, intelligent services and approaches for achieving climate targets to the trade visitors. The attractive supporting program of the E-world Congress and the open expert forums will also provide valuable impulses on the way to a climate-neutral future and open up new perspectives.

Meet new and old contacts at E-world personally and directly. We are looking forward to meeting you!

INTERNATIONAL VISIBILITY
MEETING POINT FOR THE EUROPEAN ENERGY INDUSTRY

Exhibitors and visitors from all over the world come together in Essen to exchange news and views on the latest market developments. A total of 67 nations were represented at E-world 2020. The international significance of the trade fair is constantly increasing. By now, every fourth exhibitor comes from a foreign country to present his products, technologies and services. One reason for this development is the growing international media coverage. In addition, international representatives of consulates and embassies exchange information about current energy issues on the “Day of the Consulates”.

SMART ENERGY
RENEWABLE, EFFICIENT AND INTELLIGENT

Smart Energy has become one of the key topics of E-world. Accordingly, Germany’s largest area devoted to intelligent and future-oriented energy solutions is on a continuous growth course. International groups as well as regional suppliers – this is the place where companies present their concepts for a digital and green energy transition. Important topics of this exhibition area include the effective networking and control of the electric power industry, storage systems and consumers as well as IT security, mobility and charging infrastructures and energy efficiency. In addition to the exhibiting companies from the energy industry, industry and IT sector, political associations and players also present themselves. The Infrastructure Forum completes the Smart Energy area with high quality lectures and panel discussions.

180 EXHIBITORS

AROUND
7,400 m² EXHIBITION SPACE

74 PRESENTATIONS
Newly founded companies set new impulses with innovative business models in many areas of the energy industry. The topic area Innovation provides a platform for young companies to present their pioneering ideas and solutions. Company founders and startups have the opportunity to establish valuable contacts to investors and representatives of the energy industry.

The topic area Innovation combines the joint booth for young and innovative companies and exhibitors from science and research. It is supplemented by a varied program including an open expert forum, workshops and the “Startup & Science Speed Dating”.

BUSINESS SPEED DATES

28 PRESENTATIONS
Students, graduates and young professionals have been using the Career Forum to find out about jobs and career opportunities in the energy industry for more than 15 years. It traditionally takes place on the third day of the trade fair and establishes a direct dialogue between companies and potential employees. During personal discussions, all questions concerning job applications, starting work and career opportunities can be answered. Companies also have the opportunity to present themselves and their know-how during lectures and panel discussions at the corresponding forum.

- 15 Years

**Over**

- 300 Participants
The areas of energy trade and energy services are central elements of E-world energy & water. More than 60% of the exhibitors come from these areas and about one quarter of all visitors have a particular interest in trade related topics. The community booth Trading Floor unites energy trade exhibitors as well as vendors of trading and forecasting software. It provides companies with the opportunity to present their products and services to an international professional audience. In face-to-face meetings, important contacts to new customers can be made and already existing customer relationships can be fostered. The related Trading Forum deals with current challenges of energy trading and energy procurement.

**OVER**

200 m² COMMUNITY BOOTH

**49 PRESENTATIONS**
As part of E-world, the congress events provide an important stage for sharing ideas, approaches and solutions each year. Renowned experts from politics, business and science present and discuss challenges and perspectives of the energy industry and analyze current developments and trends. Over three days, visitors can expect an informative program of conferences, seminars and workshops.

The congress is therefore seen as providing an impetus and a discussion platform for the entire energy industry, involving international and European topics and speakers. The intensification of collaboration with scientific research institutions, and reports from practical applications also point this way.

Information on the Congress program will be available shortly on our website and in the E-world Community.
In the exhibition halls, visitors can expect a diverse supporting program. The open expert forums Trading, Infrastructure, and Customer Solutions are examining different aspects of the energy industry. Lectures on current developments and exciting panel discussions offer a varied program on all three days of the trade fair.

**TRADING FORUM**

Stock markets and energy procurement are the anchor points of this forum. Topics such as marketing strategies, stimulation of the renewables, forecasting or emissions trading are addressed.

**INFRASTRUCTURE FORUM**

The forum is concentrating on different infrastructures that are already or will be relevant for the energy industry. Current and future requirements for grids, sector coupling, storage or fibreglass are being discussed.

**CUSTOMER SOLUTIONS FORUM**

Energy products and services for customers are the central point of this forum. B2B2C business cases will be presented in the field of small renewable power plants, digitalisation, smart meter, and many more.
