E-WORLD ENERGY & WATER

EUROPE'S LEADING ENERGY TRADE FAIR

11TH– 13TH FEBRUAR 2020 ESSEN, GERMANY

E-WORLD ENERGY & WATER

THE LEADING TRADE FAIR FOR THE ENERGY INDUSTRY

E-world energy & water is gathering decision-makers of the European energy industry. The exhibitors present their sustainable technologies and intelligent solutions for the energy future to professional visitors. A high-quality program including the E-world Congress and four open expert forums complement the exhibition. Industry experts discuss challenges and present solutions to current energy issues there.

E-world 2020 combines the two key topics Smart City and Climate Solutions for you – the aim: to encourage sustainable transformation and promote intelligent infrastructures.

Take advantage of E-world from 11th to 13th February 2020 to foster business relationships and establish new contacts. We are looking forward to seeing you.

SMART CITY & CLIMATE SOLUTIONS

SUSTAINABLE SOLUTIONS FOR AN INNOVATIVE ENERGY FUTURE

In times of advancing urbanization, cities are becoming pioneers in developing innovative ideas and measures to protect the climate. Being major contributors to climate change, cities are also especially affected by its consequences. Digitization and smart city concepts have the potential to make urban areas more efficient and sustainable. The key challenge will be the integration of electricity and heat, smart buildings and e-mobility into an intelligent and resource efficient system.

As a driver of innovative and renewable technologies, the energy industry plays a key role in this process. Therefore, E-world 2020 extends its focus and combines Smart City and Climate Solutions – to encourage sustainable transformation and promote intelligent technologies, services and infrastructure.

INTERNATIONAL VISIBILITY

MEETING POINT FOR THE EUROPEAN ENERGY INDUSTRY

Exhibitors and visitors from all over the world come together in Essen to exchange news and views on the latest market developments. A total of 73 nations were represented at E-world 2019. The international significance of the trade fair is constantly increasing. By now, every fifth exhibitor comes from a foreign country to present his products, technologies and services. One reason for this development is the growing international media coverage. In addition, international representatives of consulates and embassies exchange information about current energy issues on the “Day of the Consulates”.

VARIETY OF TOPICS

E-WORLD AS A REFLECTION OF THE ENTIRE INDUSTRY

E-world represents the great diversity of the energy industry and its topics and thereby provides an excellent opportunity to learn about successful concepts and solutions. The focus of the trade fair is on products, technologies and services in the areas of energy services, information technology and energy trade.

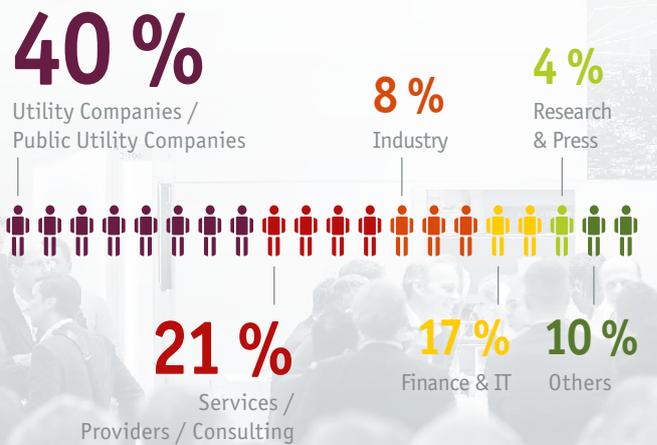

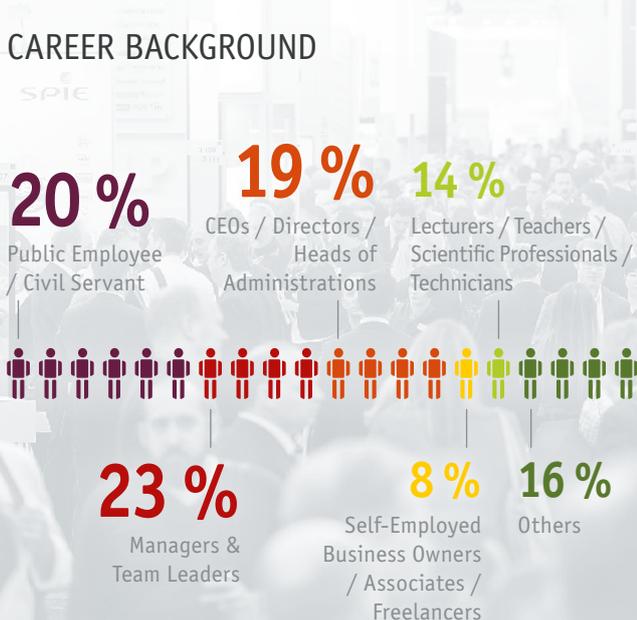

In addition, the topic area "Smart Energy" is devoted to intelligent, efficient and renewable solutions. The topic area "Innovation" places its emphasis on the future of the energy industry: Start-ups und research institutes present their new and innovative products and solutions.

RANGE OF TOPICS

VISITOR STRUCTURE

CAREER BACKGROUND

SMART ENERGY

RENEWABLE, EFFICIENT AND INTELLIGENT

The importance of smart and efficient products, solutions and technologies is exemplified by the Smart Energy area. These topics are strongly gaining relevance within the energy industry: Over the past three years, the number of exhibiting companies has more than doubled. Important topics of this exhibition area include the effective networking and control of electricity producers, storage systems and consu-

mers as well as IT security and energy efficiency. In addition to the exhibiting companies from the energy industry, industry and IT sector, political associations and players also present themselves. Expert forums on Energy Transition and Smart Tech including high-quality lectures and panel discussions complete the Smart Energy area.

E-WORLD INNOVATION

EXPERIENCE TODAY THE ENERGY WORLD OF TOMORROW

Newly founded companies set new impulses with innovative business models in many areas of the energy industry. The topic area Innovation provides a platform for young companies to present their pioneering ideas and solutions. Company founders and start-ups have the opportunity to establish valuable contacts to investors and representatives of the energy industry.

The topic area Innovation combines the joint booth for young and innovative companies and exhibitors from science and research. It is supplemented by a varied program including an open expert forum, workshops and the "Business Speed Dating".

CAREER FORUM

FIND YOUR EMPLOYEES OF TOMORROW

Students, graduates and young professionals have been using the Career Forum to find out about jobs and career opportunities in the energy industry for 15 years. It traditionally takes place on the third day of the trade fair and establishes a direct dialogue between companies and potential employees.

During personal discussions, all questions concerning job applications, starting work and career opportunities can be answered. Companies also have the opportunity to present themselves and their know-how during lectures and panel discussions at the corresponding forum.

TRADING FLOOR

SOLUTIONS FOR THE FUTURE OF ENERGY TRADE

The areas of energy trade and energy services are central elements of E-world energy & water. More than 60% of the exhibitors come from these areas and about one quarter of all visitors have a particular interest in trade related topics. The community booth Trading Floor unites energy trade exhibitors as well as vendors of trading and forecasting software. It provides com-

panies with the opportunity to present their products and services to an international professional audience. In face-to-face meetings, important contacts to new customers can be made and already existing customer relationships can be fostered. The related Trading & Finance Forum deals with current challenges of energy trading and new opportunities in finance.

E-WORLD CONGRESS

DISCUSSION PLATFORM FOR THE ENERGY INDUSTRY

Within the framework of E-world, visitors and exhibitors can look forward to a three-day expert congress, which includes conferences, seminars and workshops dealing with the latest energy issues. Renowned experts from politics, economy and science present and discuss challenges of the energy industry of tomorrow, latest developments in the fields of sales, trading and current legal issues.

The congress is therefore seen as providing an impetus and a discussion platform for the entire energy industry, involving international and European topics and speakers. The intensification of collaboration with scientific research institutions, and reports from practical applications also point this way.

Information about the Congress program will be available on our website from October.

OPEN EXPERT FORUMS

EXPERTS DISCUSS CURRENT CHALLENGES

In the exhibition halls, visitors can expect a diverse supporting program. The four open expert forums for Innovation, Energy Transition and Smart Tech as well as the Trading & Finance Forum shed light on different aspects of the energy industry. Lectures on current developments and exciting panel discussions offer a varied program on all three days of the trade fair.

ENERGY TRANSITION

The politically oriented Energy Transition Forum focuses on future developments in the energy market and current trends.

SMART TECH

The Smart Tech Forum places its emphasis on technical matters, such as innovative grid technologies, smart metering and energy management.

TRADING & FINANCE

The Trading & Finance Forum deals with current challenges of energy trading and new opportunities in finance.

INNOVATION

The Innovation Forum provides space for start-ups to present their innovative ideas. Furthermore, industry experts discuss the topics of founding and innovation.
